

Untitled

The attached filing was submitted on my behalf without my consent. The views expressed in this filing are opposite of my own beliefs. This filing system is flawed in that there is no check of legitimacy for filings or verification of address. This filing was used under an address that I no longer reside at, yet I know the owners well and know that there is no occupant that 'coincidentally' shares my name. I would like this original filing struck from any record, and this reply to take its place.

I do not support the FCC's attempt to remove the Obama Administration's restrictions that were placed on ISPs.
